	TRADE NAME AND SYNONYMS Oxygen, LOX (Liquid only), GOX (Gas only)
EMERGENCY PHONE: 800—523-9374 IN PENNSYLVANIA: 800—322-9092	CHEMICAL NAME AND SYNONYMS Oxygen
ISSUE DATE AND REVISIONS 1 February 1980	FORMULA CHEMICAL FAMILY O2 Oxidizing gas

#### **HEALTH HAZARD DATA**

THRESHOLD LIMIT VALUE

N/A

SYMPTOMS IF INGESTED, CONTACTED WITH SKIN, OR VAPOR INHALED

Oxygen is nontoxic under most conditions of use and is necessary to support life. Liquid oxygen or cold gas will freeze tissues and can cause severe cryogenic (extreme low temperature) burns.

### TOXICOLOGICAL PROPERTIES

Oxygen is nontoxic under usual conditions of use. Breathing pure oxygen at one atmosphere, however, may produce cough and chest pains within 8-24 hours. Concentrations of 60% may produce these symptoms in several days. At two atmospheres symptoms occur in 2-3 hours.

Partial pressure of oxygen in excess of two atmospheres may produce a variety of central nervous system manifestations including tingling of fingers and toes, visual and hearing disturbances, abnormal sensations, paired coordination, confusion, muscle twitching, and epileptiform seizures. Severe hazards may be prent when confusion and impaired judgment lead to operational errors.

Infants exposed to oxygen levels in excess of 35-40% may suffer permanent visual impairment or blindness due to retrolental fibroplasia.

## RECOMMENDED FIRST AID TREATMENT

If cryogenic liquid or cold boil-off gas contacts a worker's skin or eyes, frozen tissues should be flooded or soaked in tepid water (105-115°F; 41-46°C). DO NOT USE HOT WATER. Burns which result in blistering or deeper tissue freezing should be seen promptly by a physician.

## FIRE AND EXPLOSION HAZARD DATA

SPECIAL FIRE FIGHTING PR	OCEDURES	A STATE OF THE STA		

Oxygen is nonflammable, but supports and vigorously accelerates combustion of flammables. To fight fires, shut off source of oxygen and fight like conventional fire.

UNUSUAL FIRE AND EXPLOSION HAZARDS

Oxygen is nonflammable, but supports and vigorously accelerates combustion of flammables. Some materials which are noncombustible in air will burn in the presence of oxygen.

### DISCLAIMER

Information contained in this data sheet is offered without charge for use by technically qualified personnel at their discretion and risk. tements, technical information and recommendations contained herein are based on tests and data which we believe to be reliable, but the accuracy or completeness thereof is not guaranteed and no warranty of any kind is made with respect thereto. This information is not intended as a license to operate under or a recommendation to practice or infringe any patent of this Company or others covering any process, composition of matter or use.

Since the Company shall have no control of the use of the product described herein, the Company assumes no liability for loss or damage incurred from the proper or improper use of such product.

codes. Liquid oxygen is stored

## OTHER RECOMMENDATIONS OR PRECAUTIONS

Oxygen is not to be used as a substitute for compressed air. Applications such as cleaning, dusting, powering pneumatic tools, etc., are not safe due to lubricating oils and other materials present. Use only with equipment specifically designed and cleaned for oxygen service. Consult Compressed Gas Association Pamphlet G-4.1, "Cleaning Equipment for Oxygen Service," for details. Liquid oxygen is cryogenic liquid. Materials of construction must be selected for compatibility with extremely low temperatures. Avoid use of carbon steel and other materials which become brittle at low temperatures. Compressed gas cylinders should not be refilled except by qualified producers of compressed gases. Refilling of compressed gas cylinders without the permission of the owner is a violation of Federal Law.

\*Various Government agencies (i.e., Department of Transportation, Occupational Safety and Health Administration, Food and Drug Administration and others) may have specific regulations concerning the transportation handling, storage or use of this product which will not be reflected in this data sheet. The customer should review these regulations to ensure that he is in full compliance.
